**Additional Notes:**

Seen by myself, JF, and SF. Highlight of the day! I was alerted to a very soft chip call among a large group of sosp, small sparrow with buffy flanks, black central breast spot, bicolored bill, and red face pattern, darker than ive seen in other atsp. Photos. Bird was appx 150m upstream of gauging station. Photo available at: <http://ebird.org/ebird/view/checklist?subID=S20940823>
