CBC RARE BIRD DOCUMENTATION FORM

Submitted as documentation of (check all that apply):

☒ Unusual species ☐ Unusual date ☐ Unusual habitat

1. Count Name: Bosque del Apache NWR Count Code: _____

2. Species Greater White-fronted Goose Age J Sex ? # 1

3. Date(s) of _____

Observation Dec 19, 2015 Time 2:30p to 3:15p

Earlier/Later dates by others, if

known eBird reports from 12/7, 12/11

4. Place North Loop on Intermittent road of B del A NWR

Nearest town San Antonio County Socorro

5. Observer Adrienne Warner

Address 400 Placido Martinez Rd. NE, Albuquerque NM 87102

Telephone/fax/e-mail 505-489-3189, ranchodelibra@gmail.com

6. Observation Details:

Other Observers Vicki Dern

Optics used Audubon Swift 8.5x42 bins, Swato 8.5x42 bins

Distance from bird 200 ft. Viewing conditions clear, sunny

Weather, sky cover clear, some clouds

Photo taken? ☒ Video? ☐ Sound recording? ☐ Specimen? ☐

Are these available to the CBC Regional Editor? ☒ Where are they? email

7. Past Experience: With this or similar species?

Life bird for me, VD seen this species several times

8. References or advice consulted:

Sibley Guide to Birds, 2nd ed. iBird Pro

9. Was this report done from notes made during or after observation or from

memory? Notes, pics made during observation

10. Notes: On back of form give complete details of this observation. Use additional sheets as needed. Include information on the bird's plumage, shape, size, vocalizations, habitat, behavior, etc. Describe exactly what you saw; include photocopies of your original notes and sketches. Name the species that you considered ID contenders; explain how you eliminated them.

Signature Adrienne Warner

Date Dec 20, 2015

I saw a dark bird feeding with hundreds of light geese in a field managed for cranes and geese. The Greater-White-fronted goose had bright orange feet and legs and an orange bill with a dark tip, suggesting juvenile. Bright white patch at base of bill extending up to forehead. White undertail coverts, and overall dark body. Breast and belly gray w/o much patterning. Distinguished from Dark morph snow goose by bill & leg color, white patch at base of bill. Though this individual does appear to have a dark ~~g~~ line running horizontally on bill, much less heavy than SNGO "grin patch."

Signature Adrienne Warner Date Dec. 20, 2015

Unmistakeable bright male in breeding plumage: dark cinnamon color on flanks, darker cinnamon mixed with brown on head. Swimming with Mallards, American Wigeons & feeding along ditch bank whilst in water. Distinguished from Eurasian Wigeon by head & back shape and by relative positioning of body in water.

Signature Adrienne Warner Date Dec 20, 2015

Three ♀ Blue-winged teal were swimming with a large group of ducks on a pond that had dried stems of water plants breaking the surface of the water and providing a bit of shelter. I would not have noticed these three, except that one duck stretched her wing, revealing baby blue. Upon closer inspection, I noted the white at the base of the bill, and throat. All three of their bills were less spatulate than a cinnamon teal. The face was quite gray, not warm-colored. They swam in and out of the plants for many minutes before passing behind bushes and out of sight.

I made a sound recording which has been emailed to count compiler, D. Hawksworth. The vocalization ~~pre~~ persists as a repeated ~~typical~~ rattle call. ~~trill song "tea-kettle, tea-kettle, tea-kettle."~~ Loud, persistent, musical, and a match in both iBird Pro & Xeno-Canto
