Description: (use additional pages as needed) I was out with my dog on a walk in oak woodland/grazing range, near my home. She saw or heard them first and as I looked up to see what she was watching, the cranes flew directly overhead. I have seen sandhills from here on other occasions.

Sandhill cranes are regular visitors to areas to the north of Silver City. They are, on occasion, seen flying over Silver City and surrounding areas; unfortunately they haven't shown up on past count day or week.
